GREENWOOD.
Saw Mill Burned.
The saw mill belonging to the Paris Manufacturing Co., on the company's wood lot in Greenwood, was burned early Saturday morning. The cause of the fire is unknown. At half-past one everything was apparently all right, and at two o'clock the mill was all on fire. The building contained boiler and engine, board saw and cutting-off saw. No lumber of any amount was burned, nor were the camps damaged.

The union Christmas tree and concert, at the Universalist church, was a very pleasant affair. A bright little program of songs and recitations by the younger members of the Sunday schools, and brief remarks by Rev. E. G. Taylor of the Baptist church, and Rev. J. H. Little the Universalist pastor, were followed by the unloading of the tree. Santa Claus had met with an accident and was not able to be present but sent a small boy with his pack for the tree. A good deal of fun was caused by the opening of this as the jokes were good and not old. During the evening Mr. Taylor was given a very handsome fur coat and Mr. Little, Mrs. Harlow, the organist, and Arthur E. Forbes superintendent of the Universalist Sunday School also received generous remembrances.

HARRISON.

Harrison's Centennial.
At a meeting held for the purpose of determining in what manner the centennial of the incorporation of the town should be observed the following committee was chosen to consider the matter, and report at an adjourned meeting to be held at Town Hall, South Waterford, Jan. 14th, 1905: Wm. H. Briggs, Geo. H. Cummings, Dr. James P. Blake, Adelbert C. Buck, Mrs. Lida A. Randall, A. Mellen Thomas, Quincy M. Chute, Samuel C. Smith, Mrs. Cora Denison, Nathaniel H. Seaver, Mrs. Alice M. Wilbur, Chas. F. Kicker, Ernest L. Gray, Almore Haskell, Alphonso Moulton, Howard L. Sampson, Geo. E. Tarbox, C. Sumner Whitney, James Thomas; and the following were added as honorary, non-resident members: Hon. Melville E. Ingalls, Hon. Geo. H. Buck, Hon. Chas. Sumner Cook, Albert S. Caswell, Esq., Willis E. Carsley, Esq., Frank P. Bennett was chosen as treasurer.
A meeting of the Committee was held last Saturday, at which sixteen of the resident members were present, and letters were read from all of the honorary members who had had the opportunity in regard to the proposed celebration, and there was a practical agreement in regard to the celebration, and as to the proper way to raise the money to pay for it. The business was started in good earnest by the subscription paper being drawn up and the sum of \$130 pledged by the Committee. The paper was placed in the hands of the proper persons to be circulated through the town at once. The committee adjourned to meet at the same place on Friday, Jan. 6th. Alphonso Moulton is the secretary.

Last week a misunderstanding in regard to the time of holding the proposed celebration it may be well to say that it will probably not be until next August. The town was incorporated on March 5, 1805, but it is thought best to postpone the celebration until mid-summer, or later. The movement was started thus early in order that there might be a plenty of time to make full preparation for a celebration that will be an honor to the town.
Crooked River Grange will install officers on Saturday, Jan. 7th, and will be an all day meeting and the annual harvest feast.
There is snow enough so that runners are used entirely, but the sleighing is very thin in some places. Ice cutting has begun, and the ice is reported to be twelve inches thick, and of good quality.
The Brackett school, which has been postponed several times on account of the prevalence of measles in the neighborhood, is to be commenced on Monday, Jan. 2nd, unless notice is given to the contrary. Ethel B. Thomas is to be the teacher.

The newly elected officers of Lake side Grange are to be installed on Friday, Jan. 13th, by State Lecturer, Hon. W. J. Thompson, who will deliver and address. The meeting is to be a public one, and will be held at the Town Hall, beginning at 7:30 P. M. This grange has 100 members now, and more are coming soon.
The Bolster's Mills Telephone Co., has just completed its new line in Waterford, where twenty-seven instruments were installed. There is a probability that the line will be extended farther in the spring, as there are several more who wish to have instruments. The telephone is fast becoming a necessity instead of a luxury, even in the country among the farmers.

G. E. Jordan has gone to work in the machine shop.
Willis Libby as usual is filling most of the ice houses in the village.
May Whitney goes to Portland this week to attend Grays Business College.

Among those home for the holidays we notice Blanche Cole from Boston and Ethel Whitney from Bridgewater Normal School.

The Congregational Sabbath School had their Christmas court and trees Saturday evening. The rostrum was tastefully decorated in green and scarlet and a large tree on either was well filled with gifts. Every number on the program was well rendered and the last number especially brought down the house and was repeated. Following is the program:

WEDDING ANNIVERSARY SUPRISE.

Continued from page 1.

Prescott Lovering, and his mother, Diantha (Butchinson) Lovering of Albany.

Mr. Lovering was born in the little house which still stands on the edge of Patch mill pond April 18, 1840. He was 24 a family of three sons and five daughters.

Two of the sons and two of the daughters still live: Mr. Lovering, his brother, Francis H. Lovering, a provision dealer, and Mrs. Alma A. Oxnard, wife of F. A. Oxnard, milk dealer at West Medford, and Mrs. Sabra Rawson Staples, wife of William R. Staples at River Falls, Wis.

Mr. Lovering received his early education in the little schoolhouse at Greenwood near the home of his birth, worked on the farm 18, spent four years with York & Newell in the lumber region at Milan, N. H., two years in the contract lumber business with his brother Frank, and in 1876 removed to Stoneham, Mass., where he worked two years as a carpenter before removing to Medford.

There a nine-year partnership with his brother in the grocery business in West Medford. This business the brother still runs. Retiring from the partnership in 1884, he went West for a year, and then took up the contracting and building.

He has made such a noteworthy success he is not long after he began to vote in Medford he entered the political field in a small way and became a member of the town committee. He was sent years ago to the Medford fire department in charge of the detail sent from Medford to the great Boston fire of Thanksgiving Day, 1889. Three years on the board of selectmen he was so honored by the citizens of the Mystic City as to be elected to the first Board of Aldermen by the largest majority given any candidate.

In 1896 he was made Mayor, to which honorable office he was reelected in 1898, serving until January 1, 1901. Although urged to run for a third term he persistently declined, and has since held no public office.

Married Dec. 25, 1875, to Emma Frances Woods, daughter of Francis and Lucy Woods of Brooks, Me., their only son, Frank Woods, was born Dec. 28, 1878. Mrs. Lovering is prominent in Baptist church work in West Medford, president of the Ladies Social Union, a member of the board of directors in the Medford Home for Aged People, and deeply interested in other charities, a woman beloved by all the city.

Their son, Frank, was educated in the Medford public schools, graduated with the degree of Bachelor of Science from Tufts, the Medford College, with the class of 1899, and two months later went into the office of the Boston Journal, of which he became Night Editor last April. Entering newspaper work amid some protestations from his friends, Mr. Lovering has risen steadily by faithful honest work from Sunday special writer to telegraph and day editor and so on to his present position.

Frank W. Lovering was married Oct. 8, 1901, to Clara Isabel Parry, a Medford girl, friend of his school and college days and the younger daughter of Joseph A. and Margaret C. Parry of Boston. They have one child, a daughter of two years and a half, little Marjorie Emma, dearest pet of its fond grandmas and grandpas.

The deep respect which Medford's people have for ex-Mayor Lovering was never more strikingly shown than at the last city election. Mr. Lovering had worked for mayoral candidate who failed of nomination. At a caucus two nights before election, henchmen of the regular nominee, by despicable insinuation and false attacks upon Mr. Lovering whose guest he was so aroused him that he took the floor and in half a dozen straightforward sentences told the men who had maligned him what he thought of them and their methods, and said he should vote for the other candidate.

The news that Mr. Lovering had broken away like wildfire through the city, the newspapers took it as a triumph, and defeated by 189 votes and Mr. Lovering's good name was vindicated. Spurred to speak, he spoke. His words changed eight hundred votes in 24 hours. It was not a victory for the man who won the mayoralty fight. It was the outpouring of a city's love and esteem for ex-Mayor Lewis H. Lovering.

Much Ado About Nothing.

In her lecture at the Vendome, Boston, Tuesday morning last week, Heloise E. Hersey, an Oxford girl, talked of the play, "Much Ado About Nothing."

In the large audience gathered to hear Miss Hersey perhaps the most interested listener was Julia Marlowe, who had the rather uncommon pleasure of hearing her work as Beatrice both criticized and highly praised by a most competent critic. Miss Marlowe has been playing in "Much Ado About Nothing," at the Hollis Street Theatre and she came to the lecture with a friend, arriving there late, so that almost nobody in the audience recognized the fact that the well-known actress was there.

What Shall We Do with Hunters.

Maine people who had occasion to go into the woods began to feel easier the morning of Dec. 13, that the hunting season on deer was closed till the 1st of October, 1905. The secure feeling was of short duration for within a week we read of a man in Athens, Eugene Sanford, being taken for a rabbit, shot by gunners and his leg broken.

One man suggests that no man should be allowed to carry a gun or rifle in the State of Maine unless he can pass a satisfactory examination. Some questions suggested:—

Can you tell a man from a moose?

Can you tell a man from a deer?

Can you tell a man from a rabbit?

Can you tell a man from a moose?

Commander W. W. Kimball Commanded for Bird Protection.

At the recent annual convention of the National Association of Audubon Societies held at Cambridge, Mass., the association expressed its appreciation of the hearty and efficient co-operation of Commander W. W. Kimball for protection of Louisiana birds.

The thanks of the National Association of Audubon Societies were extended to Commander W. W. Kimball, United States Navy, inspector of the Eighth Lighthouse district, for his splendid services in the cause of bird protection, in ordering the posting and guarding of the breeding grounds of sea birds which occupy the Chandeliers and Errol Islands Lighthouse reservation.

The work of posting the islands was ordered by Commander Kimball late in October, and he has seen to it that the orders have been carried into effect.

Commander Kimball is the son of the late Gen. William K. Kimball of Paris Hill and a brother of the late Mrs. Henry M. Beane of Norway.

Booming Canadian Resorts.

The Grand Trunk Railway System has completed arrangements for an extensive exhibit at the Sportsmen's Show, to be held in Madison Square Garden, New York, from February 21st to March 9th, 1905.

A most desirable space, covering a floor area of 500 square feet and a wall space in the pavilion that will be erected of about 1,500 feet has been secured.

The exhibit will consist of fish and game and other features of interest to sportsmen and the lovers of forest life, and Canadian haunts for the hunter and angler will be exploited. From the great interest that is taken each year in this attractive exposition, it is expected that the attendance the coming season will reach at least one hundred and fifty thousand people.

The Albino Deer.

Continued from page 2.

for boys, though they may be smart and brave. Let the old man, who has met them before, deal with this one. As I finished speaking there was a sound of violent rustling in the adjacent bushes and the fall of some heavy body.

"There," exclaimed Tom, "the poor deer is done for."

"Yes," said I, "and now is my time. Stand back boys and don't obstruct the doorway but give me a chance to jump back." I opened the door sufficiently to throw a strong light in the direction of the tree to which the deer had been tethered. Then peering in that direction I beheld two shining orbs staring like balls of fire. Taking deliberate aim I pulled the trigger, at the same time jumping backward and closing the door.

One terrific scream, a leap in the direction of the door, then all was still.

"We now sallied forth to view the scene. Near the door, with a ghastly wound between his eyes laid the creature whose stuffed hide you see before you. The poor deer lay under the tree with a big wound in his throat."

This ended the old man's story, to which I had listened with profound attention. We now made a tour of the room, where enclosed in glass cases set in nice mahogany frames were displayed a great variety of beasts, birds, reptiles and fishes too numerous to mention, all so lifelike as to render one nervous.

After passing a very pleasant evening in social chat we retired for the night. Next morning the sun rose bright and clear. My team was brought to the door and after donning my wraps, I called for my bill. "Bill," retorted Uncle Dick, "we never charged or received a cent yet for entertainment and surely shan't commence with you." I then offered a present to the young ladies, which they refused with thanks, saying that their father would be offended when he came to know it. "Well," I replied, "you needn't tell him." "Oh," they persisted, "we never hide any act from father."

Thanking them kindly I was politely assisted into my carriage and the entire group came down to the gateway to bid me goodby. After a hearty handshake with each member I bade farewell to this happy and contented family and pursued my journey with a heart wishing that the world might have more such. As good luck would have it I finished my business and returned to good old State of Maine ere dawn winter came to shut the scene.

Both are deservedly worthy of the many congratulations they have received. Hearing of Chamberlain's Cough Remedy, I tried it, and after using two small bottles, I was completely cured. This remedy is intended especially for coughs and colds. A Certain Cure for Croup.
When a child shows symptoms of croup there is no time to experiment with new remedies, no matter how highly they may be recommended. There is one preparation that can always be depended upon. It has been in use for many years and has never been known to fail, viz: Chamberlain's Cough Remedy. Give it, and a quick cure is sure to follow. Mr. M. F. RISO'S CURE FOR CONSUMPTION

FARM FIELD AND GARDEN

IN THE TURKEY SEASON.

An Expert Tells of Housing, Feeding and a Fine Finish.
Old corn is better than new for heavy feeding of turkeys, as the latter is apt to cause looseness of the bowels. It is necessary to use new corn, it should be introduced into the ration gradually. If poultry have gained a strong, well developed physique by early fall they will be in fine condition for heavy feeding. As soon as they have become accustomed to grain feeding they may be fed once or even twice a day on ground oats and cornmeal mixed with milk. This should be given in addition to an abundance of wheat and corn. They should be fed each time just what they will eat up clean with a finish. Feed the grain mornings and evenings and the mixture at noon or twice between morning and evening, as best suits your convenience. See that plenty of sharp grit is always at hand for their use and provide a constant supply of fresh water where they may help themselves.

Comfort in Cold, Snowy Weather.
In cold climates where shelter must be provided for turkeys a house may be built that is fashioned after many of our poultry houses with the slanting roof. An open ventilator should be placed in front close to the roof and never be closed except in cold weather.

A TURKEY HOUSE, REAR VIEW.

The roosts should be placed on a level in the front of the house, with a sliding or rolling door in the rear. Only light enough is needed for the turkeys to see the way to and from the roosts. The door should be left open all day that they may come and go at pleasure. Within this house they may be fed in cold, snowy weather.

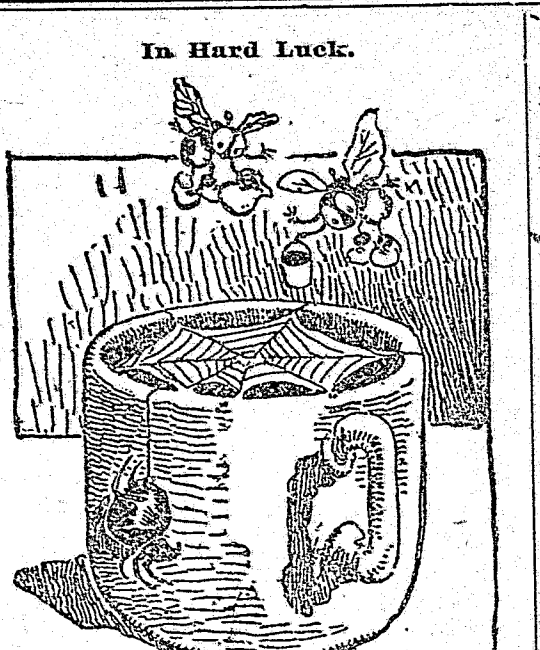

Finishing for Fancy Market.
Some who grow turkeys for a fancy market feed them chestnuts and celery seed during the last few weeks of fattening. These are rather expensive articles of food and can only be used by those who sell their product for almost double the average market price. Such feeding imparts a pleasant flavor that adds value to the turkeys which are finally sold at the highest prices for the tables of those with whom cost is a minor consideration. Where the scale of prices is regulated solely by quality the finest selected grades will sell from 9 to 12 cents per pound higher than will the lower grades. To grow the best is quite as easy and but little more expensive than to grow the poorer grades, and the profit gained is almost double.—T. E. McGraw.

Durum Wheat Flour For Bread.
From chemical examination of durum wheat bread Messrs. Carleton and Chamberlain conclude:
First.—Durum wheat flour produces a bread that, as a rule, contains slightly more moisture and loses this moisture at a slower rate than bread made from hard spring wheat flour.
Second.—The average weight of loaves of equal loaf volume is slightly greater in the case of durum wheat flour than of flour from hard spring wheat.
Third.—The average loaf volume of loaves scaled to the same weight when molded is almost the same with the two kinds of flour.
Fourth.—Durum wheat flour and the bread made from it contain noticeably larger amounts of sugar than hard spring wheat flour or bread.
Fifth.—The ash content of durum wheat flour and bread is greater than that of hard spring wheat flour or bread.
Sixth.—The food value of the two kinds of bread, as measured by the heat of combustion, is practically the same.

Rhubarb For Spring Forcing.
If the rhubarb is inclosed in frames I would allow it to remain exposed so that the soil and plants will become frozen, as rhubarb seems to require a period of rest. After the ground is frozen to a depth of one foot or more the frames can be filled with litter and covered with sash or boards to keep out the water. As spring approaches the litter should be removed and the sash replaced. A few days of sunshine will soon start the rhubarb, when an application of nitrate of soda will push things along. Care should be taken that the frames have air on bright days.—J. Jeannin in Rural New Yorker.

The Butter Eye.
A yellowish tinge in the skin is considered a point of great importance in Jersey cattle. How much foundation there may be for it has never been satisfactorily determined, remarks an exchange, but there is an impression among certain breeders that the presence of an orange circle around the eye is indicative of the ability of the cow possessing it to not only produce a great yield of butter, but to give butter of good quality and the highest flavor.

Accidents in the Maine Woods.

No fewer than eleven persons have been shot in the Maine woods during the past three months. The assumption is that they were mistaken for deer. Of course the ones who did the killing are sorry; they keenly regret their acts; doubtless the remainder of their lives will be saddened by the fact that they have taken human life. But that does not bring back the man who was killed, nor does it furnish much consolation to his relatives and friends.

Of course it seems hard that a man should be imprisoned for an act that he has committed by accident, and for which he feels sorry. Yet something must be done. These accidents are altogether too common.

The fact is that a man has no right to shoot at a noise, a movement of the bushes, or something that in the distance resembles a deer. He must run the risk of losing his game till he is certain that it is really a deer, or other animal. It is better to lose a thousand deer than to kill one man.

To say that the killing was an accident does not make it right. It cannot be right. This kind of accidents must be prevented. Such extreme penalties should be inflicted as will cause hunters to be more careful in the future and at last entirely stop this shooting by mistake.

The Primary school registers thirty-five scholars this term. They are doing good work under the excellent discipline of Harriet Walker, of Farmington, who bears a good record as a teacher, having taught twenty-one terms in public schools, and has also taught to some extent in a girls' reform school. The only thing to be regretted is that this term is only eight weeks duration. The school is being taught by Alice Sawyer, of Milton, who is also an excellent teacher.

Dr. and Mrs. Ralph Buckman, formerly of this town but now of Portland, spent the summer abroad returning late in September. They are now en route for southern California, where they will spend the winter. They spent some days at the St. Louis Exposition, and are visiting principal cities on the route being now in Denver, Col. The doctor is a young man of ability, and has a good practice in Portland. It is to be regretted that on account of poor health he is obliged to give up his practice for a while.

George S. Stephens has returned from the city. Our traders in general have had a good supply of holiday goods, and have taken great pains to arrange their windows in a neat attractive manner. To some of us perhaps on whose head Father Time is lightly laying his hand, Christmas fails to bring the delight and expectancy that it did once, but let us remember that with our little ones it remains the same, and let us study their wishes and see to it that there are no disappointed little hearts during the holiday season, and let us live over those delightful days by watching them, for what is more interesting than a child?

The Skin of the Road.

Rubber sidewalks are too much to expect in this expensive world at present. Strips of them have been laid here and there, as in London, and they are said to be the bright consummate flower of sidewalks; but they cost too much. Meanwhile some of the engineers of the French department of bridges and roads have been laying the dust in the latter. They coated certain pieces of road with tar. At the end of a year dust and mud have practically disappeared from those tarred pieces. These are now covered with what is described as an "elastic skin" on which dust and mud are not formed.
Over these tarred roads horses and oxen can pull the same weight as before with only half the effort formerly needed. Hoofs and feet make a good deal less noise. The tarring process has lowered the cost of keeping in good condition the road to which it has been applied. In short, if these engineers are not too enthusiastic in their report, tar is the only wear for roads.
